In this guide, you will learn how to use iMovie to edit your video submissions and upload them to YouTube for easy access.

First, record your first (week 1) and last (week 6) classes.

- Video your class on your phone or tablet (or other recording device)
- Make sure to include your entire introduction
- *Note*: record the first run for all of the dogs and the last run for all of the dogs to ensure that you have options

Download your videos to your computer (*depending on the type of the device you are using, look up the best ways to download mp4 or other video content to your computer*)

- You can either keep the file in your downloads folder or save it to your files. Rename it something you can easily recognize, like "Intro class week 1"
- Do this process for all videos or clips you want to use for a given submission.

Install iMovie on your computer. *It is free to download and very user-friendly.* Open iMovie. Click on the projects tab. Click on create new, and choose the option "Movie"

	Movie Combine videos, photos, and music to make your own movie.	
	Trailer Follow a template to create a Hollywood style movie trailer.	
10,229,000 M		ľ

You will arrive at this screen

• *Note:* the original file I downloaded from my phone was in MOV format. When I import the files into iMovie, you will see they are MP3 format because I had to retrieve them from another file for the purpose of this guide. You DO NOT need to export your video files to MP3 before importing them into iMovie

Adjust the text of your title. You can add additional titles anywhere in your video by splitting the clips.

Once you have selected all of the content of your video and inserted any titles you want, click on "Projects" on the top left of your screen.

Click on the three dots to the right of your new movie, and click on "Rename Project"

Then click on the three dots again, click on "Share Project" and click on "File"

Click on "Next"

Choose the location you want your exported video to be saved

The little circle on the top right of your iMovie screen will tell you the progress of your export

Once the export is completed, you may get a notification

To upload your video to YouTube, you'll need to create an account. Once you've done so, click on "your videos," which will take you to your creator studio
