

"We started a K9 Nose Work® program in our shelter and within four weeks, three of our dogs that had been kenneled for longer than six months were adopted. We credit K9 Nose Work® with helping these dogs fit into and stay in forever homes. Thank you, K9 Nose Work® !"

Cristin Felso, Executive Director
Animal Protection Society
Friday Harbor, Washington State

Introducing the K9 Nose Work® Shelter Research Initiative

The objective of the research study is to provide solid statistical data to support the many accounts of how K9 Nose Work® has helped shelter dogs to become more readily adoptable. Shelters that provide K9 Nose Work® programs for their dogs report calmer, more confident, and happier dogs. Data that supports these findings can help shelters to acquire funding for K9 Nose Work enrichment through grants and private donors.

You can help. Contact shelterproject@k9nosework.com today

K9 Nose Work® Shelter Program

shelterproject@k9nosework.com

A proud partner in olfactory research for the advancement of shelter dogs around the world.

The benefits of K9 Nose Work® are obvious to caring dog lovers, like yourself, and for those who participate in the sport detection activity of Nose Work. Benefits are obvious to the shelters and rescue organizations that embrace K9 Nose Work® within their facilities. But sadly, not all shelters offer Nose Work® as an enrichment program for their dogs. And, as you may have already discovered, not everyone understands the benefits. This is where a carefully-controlled scientific research study may help. Because just like dogs, data doesn't lie. You can help by spreading the word. Please provide this flyer to your local shelter administrator and suggest that they contact shelterproject@k9nosework.com in order to participate in a quick survey. Information collected from this survey will help the research team determine how to shape the research protocol for this important study. Thank you for your help in making science happen for the benefit and betterment of shelter dogs.

A published and peer-reviewed research study can benefit shelters by helping them secure much-needed funding for the purpose of implementing an ongoing K9 Nose Work® enrichment program for their dogs.
